PROFESSIONAL EXPERIENCE

- Freelancer | Senior Full Stack Engineer, Upwork | Remote** 02/2025 - present
United States
I have nearly completed projects as a PHP full-stack developer, but my primary skills and experience are in ASP.NET ☑ C#, Nest.js, and React/Angular/Electron.js. I plan to contribute to my next project using these core technologies
- Full Stack Engineer, Superscript | Remote** 02/2023 - 02/2025
London, United Kingdom
I was responsible for implementing error tracking, optimizing performance, developing scalable APIs, and ensuring high code quality through test-driven development.
- Full Stack Developer, Deepki | Hybrid** 01/2022 - 12/2022
Paris, French
In this role, I designed and developed a containerized architecture, implemented scalable real-time communication solutions, optimized state management for improved performance, and ensured secure system operations. As part of my hybrid work arrangement, I traveled to France one day per month.
- Senior Software Engineer, Databricks | Remote** 02/2021 - 12/2021
United States
Mainly, in this company, I tackled challenges related to database load balancing, designed a reliable transaction logging system, and fostered effective team collaboration in a remote work environment.
- Freelancer | Frontend Developer, Toptal | Remote | Part Time** 01/2019 - 12/2021
United States
As a part-time freelancer, I primarily developed and maintained frontend projects, optimized API integrations, improved system performance, and streamlined deployment processes to enhance scalability and efficiency.
- Full Stack Engineer, BeeWeb | Remote | Part Time** 12/2017 - 12/2020
Yerevan, Armenia
BeeWeb is a software development company with a decade of experience across industries such as fintech, healthcare, and data analytics. We provide a range of outsourcing services, including MVP development, SaaS solutions, and custom software development, along with QA testing, support, and maintenance. As a full-stack engineer, I successfully completed and deployed two projects.
- Senior Backend Developer, eWorks | Onsite** 03/2014 - 09/2017
Yerevan, Armenia
eWorks is a web development agency where I worked as a backend developer, leveraging my solid skills and experience. I contributed to designing a microservices architecture, improving server load balancing, and managing deployments.

Software Development Consulting & Development, *VOLO / Onsite*

Volvo is a leading software agency in Armenia, where I began my career in web programming. I contributed to full-stack development across a variety of applications

07/2010 - 11/2013

Yerevan, Armenia

EDUCATION

Faculty of Informatics (Computer Science) and Applied Mathematics, *Yerevan State University*

Researched computer vision and artificial intelligence.

2016 - 2020

Yerevan, Armenia

Bachelor's degree in Computer Science, *Queen's University Belfast*

I began my journey in Computer Science and learned the fundamentals of programming.

2007 - 2010

North Ireland,
United Kingdom
